Just so you know... I cannot simply hit reply to your messages from the FEMA-NRCC-ohul box... It comes back undeliverable... had the same issue when Jen and Laura was there... so I just emailed back to their email boxes also...

**With Regards, Steve**

**Subject:** FW: TCEQ RFI REPORT - Inoperable Water Facilities

Here's another request for information on the status of specific water facilities (note that the request doesn't indicate drinking or wastewater). Any info you can provide will be greatly appreciated, and I will endeavor to share it with the at least 4 different entities here in the NRCC who have asked for WTP/WWTP status reports.

Regards,

Steve

Steve Touw, NRCC ESF-10 Oil and Hazmat Unit Leader

FYSA-

Does EPA have visibility and current status on these facilities? If so, please share this information with us. Thank you!

Gary,

Please check to see if this was provided for the spreadsheet HQ sent out on WTPs.

It went up to Region at 0926 this morning, but none of the data shows on HQ's spreadsheet. Although this data is not granular and only lists Texas Counties with WTP system issues from the event, it is what we have received from TCEQ.

I expect we'll receive additional information in the morning from our State partners.

Thanks,

Brian
